PROFILE

Junior Web Developer in my 2nd year of Software Engineering, seeking an **exciting opportunity**. Passionate about the web, I work with modern technologies to build **clean and efficient solutions**.

SKILLS

Front-end: HTML5, CSS3, JavaScript, **Angular, React, Bootstrap, PrimeNG**, **Back-end:** PHP (Laravel), Python, Java, C, **Databases:** MySQL, **Methodologies & Tools:** Modeling UML (Unified Modeling Language) | **Agile Development** | **Version Control:** Git, GitHub | **APIs:** REST

PROFESSIONAL EXPERIENCE

My Portfolio 2025/08 – 2025/08 | Sfax Tunisia
I built my **personal portfolio website with Angular**, showcasing my **projects, skills, and experience** in a clean, interactive design. It highlights my **web development abilities** and gives a quick, engaging view of my work.

Avantages Soft Summer Internship 2025/06 – 2025/08 | Sfax, Tunisia

- Strengthened expertise in **Angular** for building modern, responsive web applications.
- Developed a **generic version of the Facturex application** (invoicing platform) using shared components to enhance scalability and maintainability.
- Implemented and optimized **printing features**, improving workflow efficiency.
- Configured and secured **role-based permissions** to ensure accurate user access control.
- Enhanced teamwork, problem-solving, and adaptability through real-world project collaboration.

Hyper Media 2024/02 – 2024/04 | Sfax, Tunisia
End of Studies Project (Internship)
Designed and developed a complete e-commerce platform. **Technologies used:** Laravel, MySQL, HTML, CSS, JavaScript.

- Designed the database and modeled it using UML.
- Developed the backend with Laravel to manage products, orders, and users.
- Created a responsive user interface with HTML, CSS, and JavaScript.
- Integrated advanced features such as online payment, stock management, and real-time notifications.
